

Invasive Species Committee

Letter to Groton Community Preservation Committee in support of the Sustainability Commission grant application for the pollinator garden extension at the Groton Center

To: Groton Community Preservation Committee

Cc: Sustainability Commission

Dear Community Preservation Committee Members,

At our November 27th meeting, the Invasive Species Committee unanimously voted to support the Sustainability Commission's CPC grant application for funding the extension of their pollinator garden at the Groton Center. We request that this work includes a plan for monitoring and maintenance to prevent invasive plant introduction. The Committee appreciates the Sustainability Commission's commitment to enhancing habitat for pollinators in Groton, important to preserving biodiversity and the ecosystem services they provide.

Respectfully,

The Groton Invasive Species Committee
