2.	Review of 2012 Progress and next steps	Maria/Kerry
3.	2012 Town Report (Who)	Chair

4.	Closing	Chair
----	---------	-------

- Meeting called to order in Town Hall @ 1540
- Minutes of March 16, 2011 Approved (4 yes; 1 abstain (SH) Unclear where notes and minutes of November 2011 meeting are. RH to follow up.
- Maria and Kerry reviewed progress in prior years and in 2012. as outlined in attached presentation (Conductorlab Presentation_12112012 “Moving to Closure Former Conductorlab Facility Groton MA”
- Kerry stated that the plan is for site closure (no further remediation action) in the 4th quarter of 2013 pending successful analysis (<50ppm of tetrachloroethylene (TCE) and <3ppm of Cr⁺⁶) at the site after one year of no active remediation.
- In addition to 4 quarters of successful groundwater analysis, additional soil vapor testing will be completed, a DEP method 3 risk characterization, and an activity and use limitation (AUL) document will be generated to govern future use of the site.
- Target date for “closure” is 2014 following submittal of a Response Action Outcome (RAO) to DEP that no significant risk exists requiring further remediation.
- Committee members requested that be part of the review of the AUL and RAO documents before they are finalized. Our participation in the review was unclear although we will continue to ask. and follow progress.
- Honeywell will work with the Town of Groton to find acceptable future uses of the site. Honeywell expects to transfer ownership of the property but will not be able to transfer liability for any remaining hazardous materials remaining on site. Arthur suggested that the Committee may need to have additional members in the closure and reuse phases. After discussion, no action was taken other than to report to the Town Manager and Selectmen. (MC)
- We expect to meet with Honeywell and Kerry in August after two quarters of testing is completed. (RH)
- Meeting adjourned at 5 PM

Robert Hanninen, Chair
