

NOTICE

GROTON WATER DEPARTMENT

SEASONAL WATER MAIN FLUSHING

The Groton Water Department will begin its annual flushing of the water distribution system on Tuesday, October 15th thru Friday, October 25th 2013. We anticipate the flushing program will take approximately two weeks to complete. You will experience discolored water and low pressure during the flushing effort and we apologize for this inconvenience.

In the event that you experience a prolonged period of discolored water, please, run numerous cold water taps for 5 to 10 minutes or until it clears up.

This is also the time to thoroughly flush your hot water tank as sediment may enter the tank during the flushing program.

The water distribution system flushing program is subject to change without notice and the dates listed below are approximate only

Please be sure to call our offices between the hours of 8:00 A.M. to 4:00 P.M. for the most up to date location of the Flushing Program or check our Web site at grotonwater.org
