

**EARTH REMOVAL STORMWATER ADVISORY COMMITTEE
JANUARY 8, 2013
MINUTES**

Chairman Perkins called the meeting to order at 7:30 PM

Members present: Perkins, Capes, Delaney, Hanninen & Swezey

LOST LAKE STORMWATER MANAGEMENT

The Committee met with Alex Woodle of the Great Ponds Advisory Committee and Groton Lakes Association to discuss stormwater runoff problems around Lost Lake and Knops Pond. Mr. Woodle said an Eagle Scout is working on a project to address runoff issues at Sargisson Beach. However, significant runoff problems and nutrient loading come from Martins Pond Brook and an unnamed stream off Nate Nutting Road

The Committee agreed to contact Comprehensive Environmental, Inc. (CEI) to inquire about applying for a Section 319 Stormwater Management Improvement Grant similar to the grant used to improve James Brook in the Town Center. The Committee will follow up with the Great Ponds Advisory Committee.

MINUTES

The Committee voted unanimously to approve the minutes of December 4, 2012.

Meeting adjourned at 7:50 PM

Respectfully submitted,

Michelle Collette
Earth Removal/Stormwater Inspector
