

Delegate Voting Module™

OPTIONPOWER® INTERACTIVE RESPONSE SYSTEM

The Delegate Voting Module™ is an add-on product for the OptionPower® interactive response system. It is designed to support group balloting and election processes by using OptionPower’s powerful interactive polling systems.

If accuracy and speed are important in your voting and election processes you will benefit from the extensive capabilities of the Delegate Voting Module™. The time to prepare, administer and hand-count referendums and election for officers and boards can consistently be reduced by more than 50%.

You will achieve measurable cost savings while conducting an orderly voting process that satisfies participants’ demand for speed and functionality.

Key Features

RECORDED OR ANONYMOUS BALLOTS

Use the roster tracking feature™ for situations where a recorded vote by participant is required. The software provides an anonymous voting mode that separates votes from individual participant identity.

ACCURATE VOTE TALLIES

The participant voting devices are not able to “stuff” the ballot box or vote multiple times for a candidate. Each voter has an equally-weighted voice in the process and multiple votes and tampering are eliminated.

FAST VOTE RESULTS

Avoid the expense and time of preparing paper ballots and waiting for manual counts. Results are available within seconds. Delegates and voters will appreciate the efficiency of the process and your ability to conduct a higher volume and quality of productive business.

Flexible Hardware Alternatives

109 Kathy Gatlin	82		
112 Mary Goddard	44		

Voters = 957

Valid Voters = 943

Required to Elect = 472

MULTI-CANDIDATE OFFICES

Quickly determine the top vote-getters for a multi-candidate office. You can see immediately if candidates meet the required quantum for election and if subsequent ballots are needed.

ON-SCREEN BALLOTS

Eliminate the cost of producing and distributing ballots and other printed materials. The ballot is projected on screen for all participants to see and can be edited in real time if required.

EXPORT ELECTION DATA

The Module supports a wide variety of layouts for reporting ballot results. Get tabulated summary or raw results in Word, Excel and other file formats.

SUPPORTS COMPLEX VOTING RULES

The Module is built to gather weighted and proxy votes. It offers unique capabilities to tabulate and display results according to complex or unusual organizational requirements.
