EXECUTIVE SUMMARY	E-1
I. INTRODUCTION	1
a. Study Methodology	6
b. Study Area and Count Program	9
II. EXISTING CONDITIONS	12
a. Circulation Network Summary	12
b. Existing (2016) Traffic Volumes	20
c. Existing (2016) Levels of Service	34
d. Historical Crash Data	37
III. FUTURE YEAR 2024 NO-BUILD CONDITIONS	40
a. Year 2024 No-Build Traffic Volumes	42
b. No-Build (2024) Peak Hour Levels of Service	46
IV. FUTURE 2024 BUILD ANALYSIS SCENARIOS	48
a. Trip Generation	48
b. Site-related Trip Distribution Patterns	61
c. Levels of Service Comparing Existing to No-Build and Build Scenarios	69
d. Traffic Mitigation Measures	75
V. CONCLUSIONS AND RECOMMENDATIONS	82

TECHNICAL APPENDIX (Separate Volume)

Automatic Count Data

Manual Count Data

Existing Indian Hill Music & Concert Count Data, Littleton, MA

Historical Crash Data Analysis 2011-2013 - Study Area Intersections

Early/Late Peak Traffic Operations Analysis Sheets – 2016 Existing Conditions

Early/Late Peak Traffic Operations Analysis Sheets – 2024 No-Build Conditions

Early/Late Peak Traffic Operations Analysis Sheets – 2024 Build Scenarios

Detailed Trip Generation Analysis Work Sheets

Detailed Trip Distribution Analysis Work Sheets

Northbound Boston Road Left Turn Lane Warrant Analysis for Evaluated Build Conditions

1	Preliminary Site Plan	2
2	Project Vicinity Map	4
3	Aerial of Site Vicinity	5
4	Study Area Traffic Counts Existing Traffic Controls and Lane Configurations	11
5	Existing Year 2016 Traffic Volumes 4:45-5:45 PM and (6:00-7:00 PM) During " <i>Typical</i> " School Peak Day Peak Hours	22
6	Existing Year 2016 Traffic Volumes 6:15-7:15 PM and (9:30-10:30 PM) During " <i>Large</i> " Friday Evening Concert Peak Hours	23
7	Existing Year 2016 Traffic Volumes 11:00 AM -12:00 Noon During " <i>Festival</i> " Saturday Mid-day Peak Hour	24
8	Existing Indian Hill Music Traffic Volumes March 14-15 Count Patterns - Ins/Outs in 15-minute Intervals	27
9	Existing Indian Hill Music Parking Demands March 14-15 by Time of Day	28
10	Boston Road (Routes 119/225) Daily Traffic Trends March 12-18, 2016	30
11	Boston Road (Routes 119/225) NB Speed Trends <35 MPM March 12-18, 2016	31
12	Boston Road (Routes 119/225) NB Hourly Volume Trends March 12-18, 2016	32
13	Old Ayer Road Daily Traffic Trends March 12-18, 2016	33
14	Year 2024 No-Build Traffic Volumes 4:45-5:45 PM and (6:00-7:00 PM) During " <i>Typical</i> " School Peak Day Peak Hours	43
15	Year 2024 No-Build Traffic Volumes 6:15-7:15 PM and (9:30-10:30 PM) During " <i>Large</i> " Friday Evening Concert Peak Hours	44
16	Year 2024 No-Build Traffic Volumes 11:00 AM-12:00 Noon During " <i>Festival</i> " Saturday Mid-day Peak Hour	45
17	Estimated Year 2024 MCIH Daily Vehicle Trips – Activity Based	54
18	Estimated Year 2024 MCIH Early and Late Peak Hour Trips by Scenario	55
19	Estimated MCIH Trip Distribution Percentages Indian Hill Music School-Related Vehicle Trips Only	62
20	Estimated MCIH Trip Distribution Percentages Concerts and Festival Vehicle Trips Only	63
21	Year 2024 Build Traffic Volumes 4:45-5:45 PM and (6:00-7:00 PM) " <i>Typical</i> " School Peak Day Peak Hours	65
22	Year 2024 Build Traffic Volumes 6:15-7:15 PM and (9:30-10:00 PM) Occasional 1,000-Patron " <i>Large</i> " Friday Concert Peak Hours	66
23	Year 2024 Build Traffic Volumes 6:15-7:15 PM and (9:30-10:00 PM) Volumes Rare 2,300-Patron " <i>Large</i> " Friday Concert Peak Hours	67
24	Year 2024 Build Traffic Volumes 11:00 AM-12:00 Noon Rare 2,300-Patron " <i>Festival</i> " Saturday Midday Peak Hour	68
25	Concept Illustration – Old Ayer Road at Boston Road Traffic Mitigation Measures	78
26	Summary of Recommended Off-site Build Traffic Mitigation Measures	81
