Transfer Station site walk. Reviewed Display boxes – noted that Velcro was not holding all display items in place.

Overall site review. Ideas discussed for Battery collection set up. The focus was how to have users self sort batteries to reduce staff time sorting. The button battery container that Jamie designed was taken out of the cabinet so that it was visible for use. Cabinet possibilities were brainstormed for additional sorting options. Promoting the project as a possible Eagle Scout project was mentioned, as well as finding a metal cabinet that could be reused or purchased. Further brainstorming needed.

Update on Artwork for Recycling Committee Tips in Herald. Diana has asked the Scout that created the artwork to let us know about the software so that her work might be recovered.

Update on Recycling in Schools. Nancy said that support is needed by staff to do better.
