Subject: Groton Farms Hearing

Greetings,

I am hoping I am sending this email to the correct person. I am a homeowner on Taylor Street and was planning to attend today's meeting, however I will not be able to make it.

Myself and half the other residents of Taylor Street are extremely concerned with the current plans for Groton Farms to include an emergency access point that is going to connect to our current dead end street. The reason for our concern is we have a combined 7 children all under the age of 7, who as of right are able to roam free with much ease. This connection will completely change the current safety dynamics.

My question is how will this access point be regulated? Will there be a gate that allows only emergency vehicles to utilize this connection?

I am just very concerned that our children won't have the same freedom to play safely in our neighborhood, which was a huge selling point when we purchased our home in 2021.

If there is somewhere else I can address my concerns please let me know.

Thank you,
Heather Taoultides
